Junction #1: Size, complexity, and demand for innovation is high?

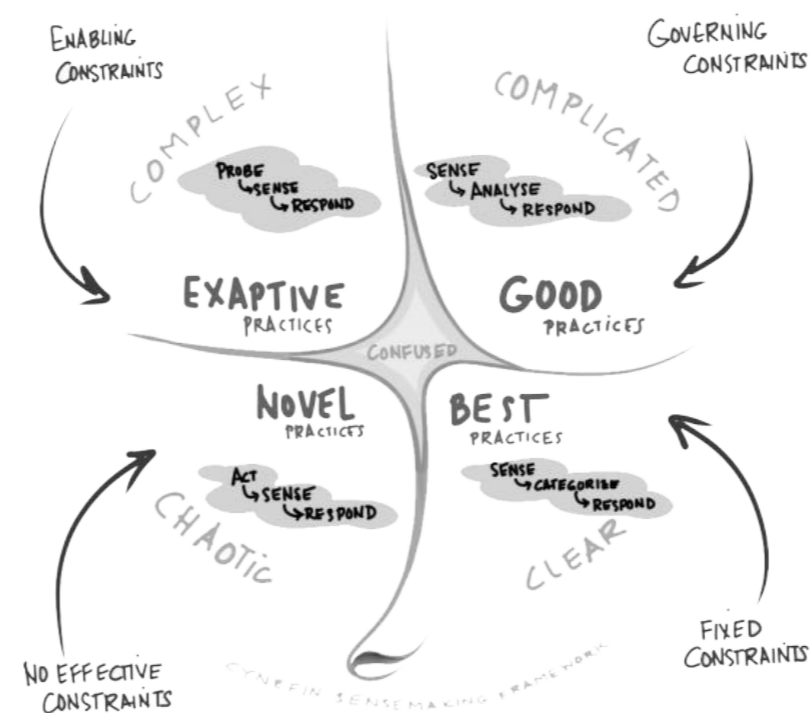

1. Discuss one or two projects of your companies
2. Are they simple/complicated or complex/chaotic?
3. Which way should you choose for the project in the Playbook?

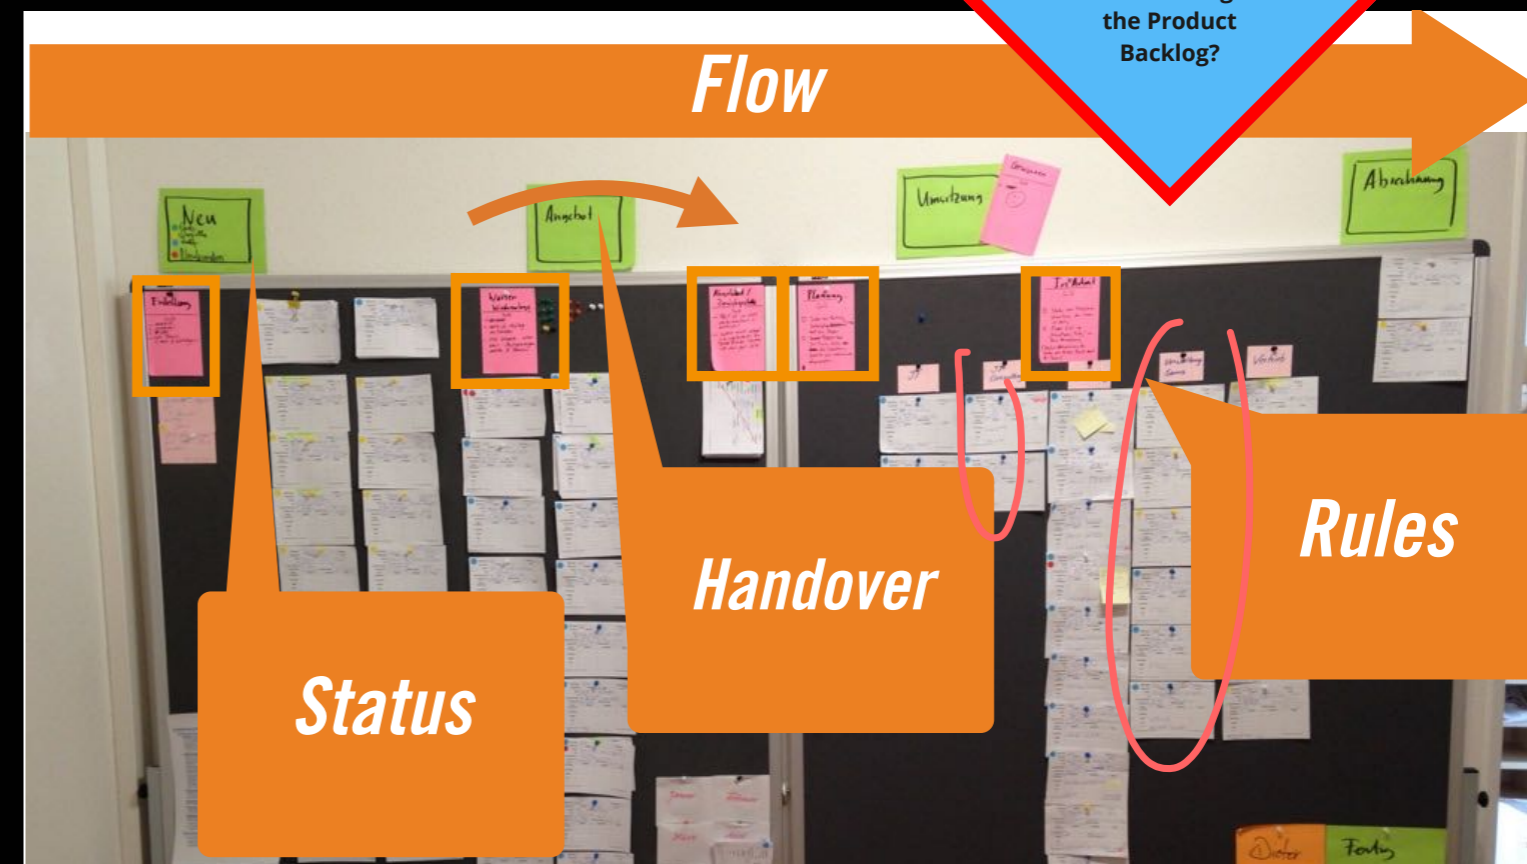

About - Cynefin Framework - The Cynefin Co

The idea of the Cynefin framework is that it offers decision-makers a "sense of place" from which to view their perceptions.

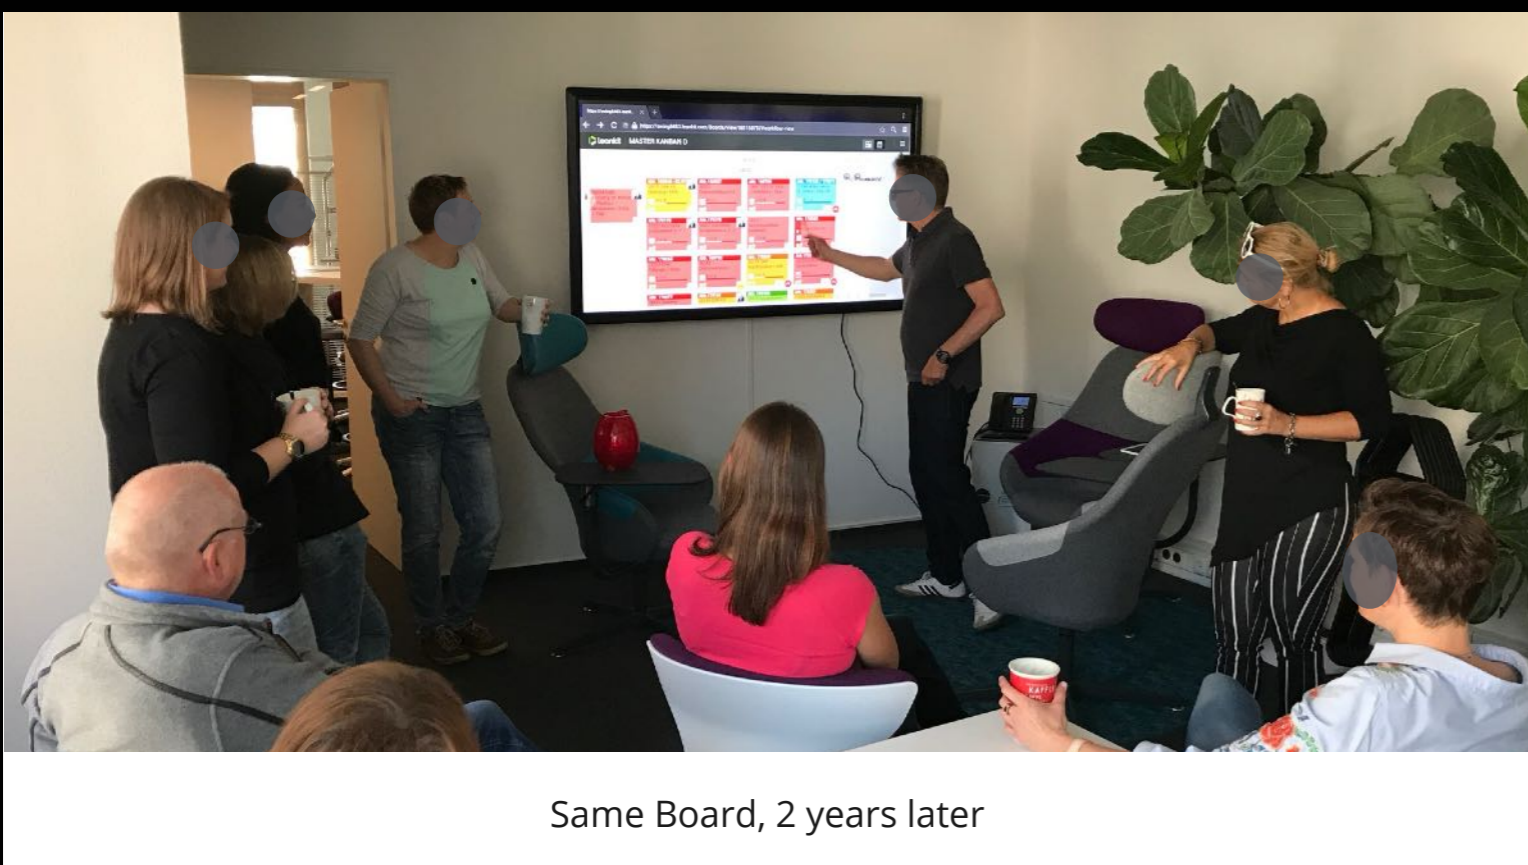

*If you don't know yet
whether your project is
complex or complicated,
then it's complex.*

You have at least on real Scrum Team working on the Product Backlog?

Problem:
Too many projects
in work.

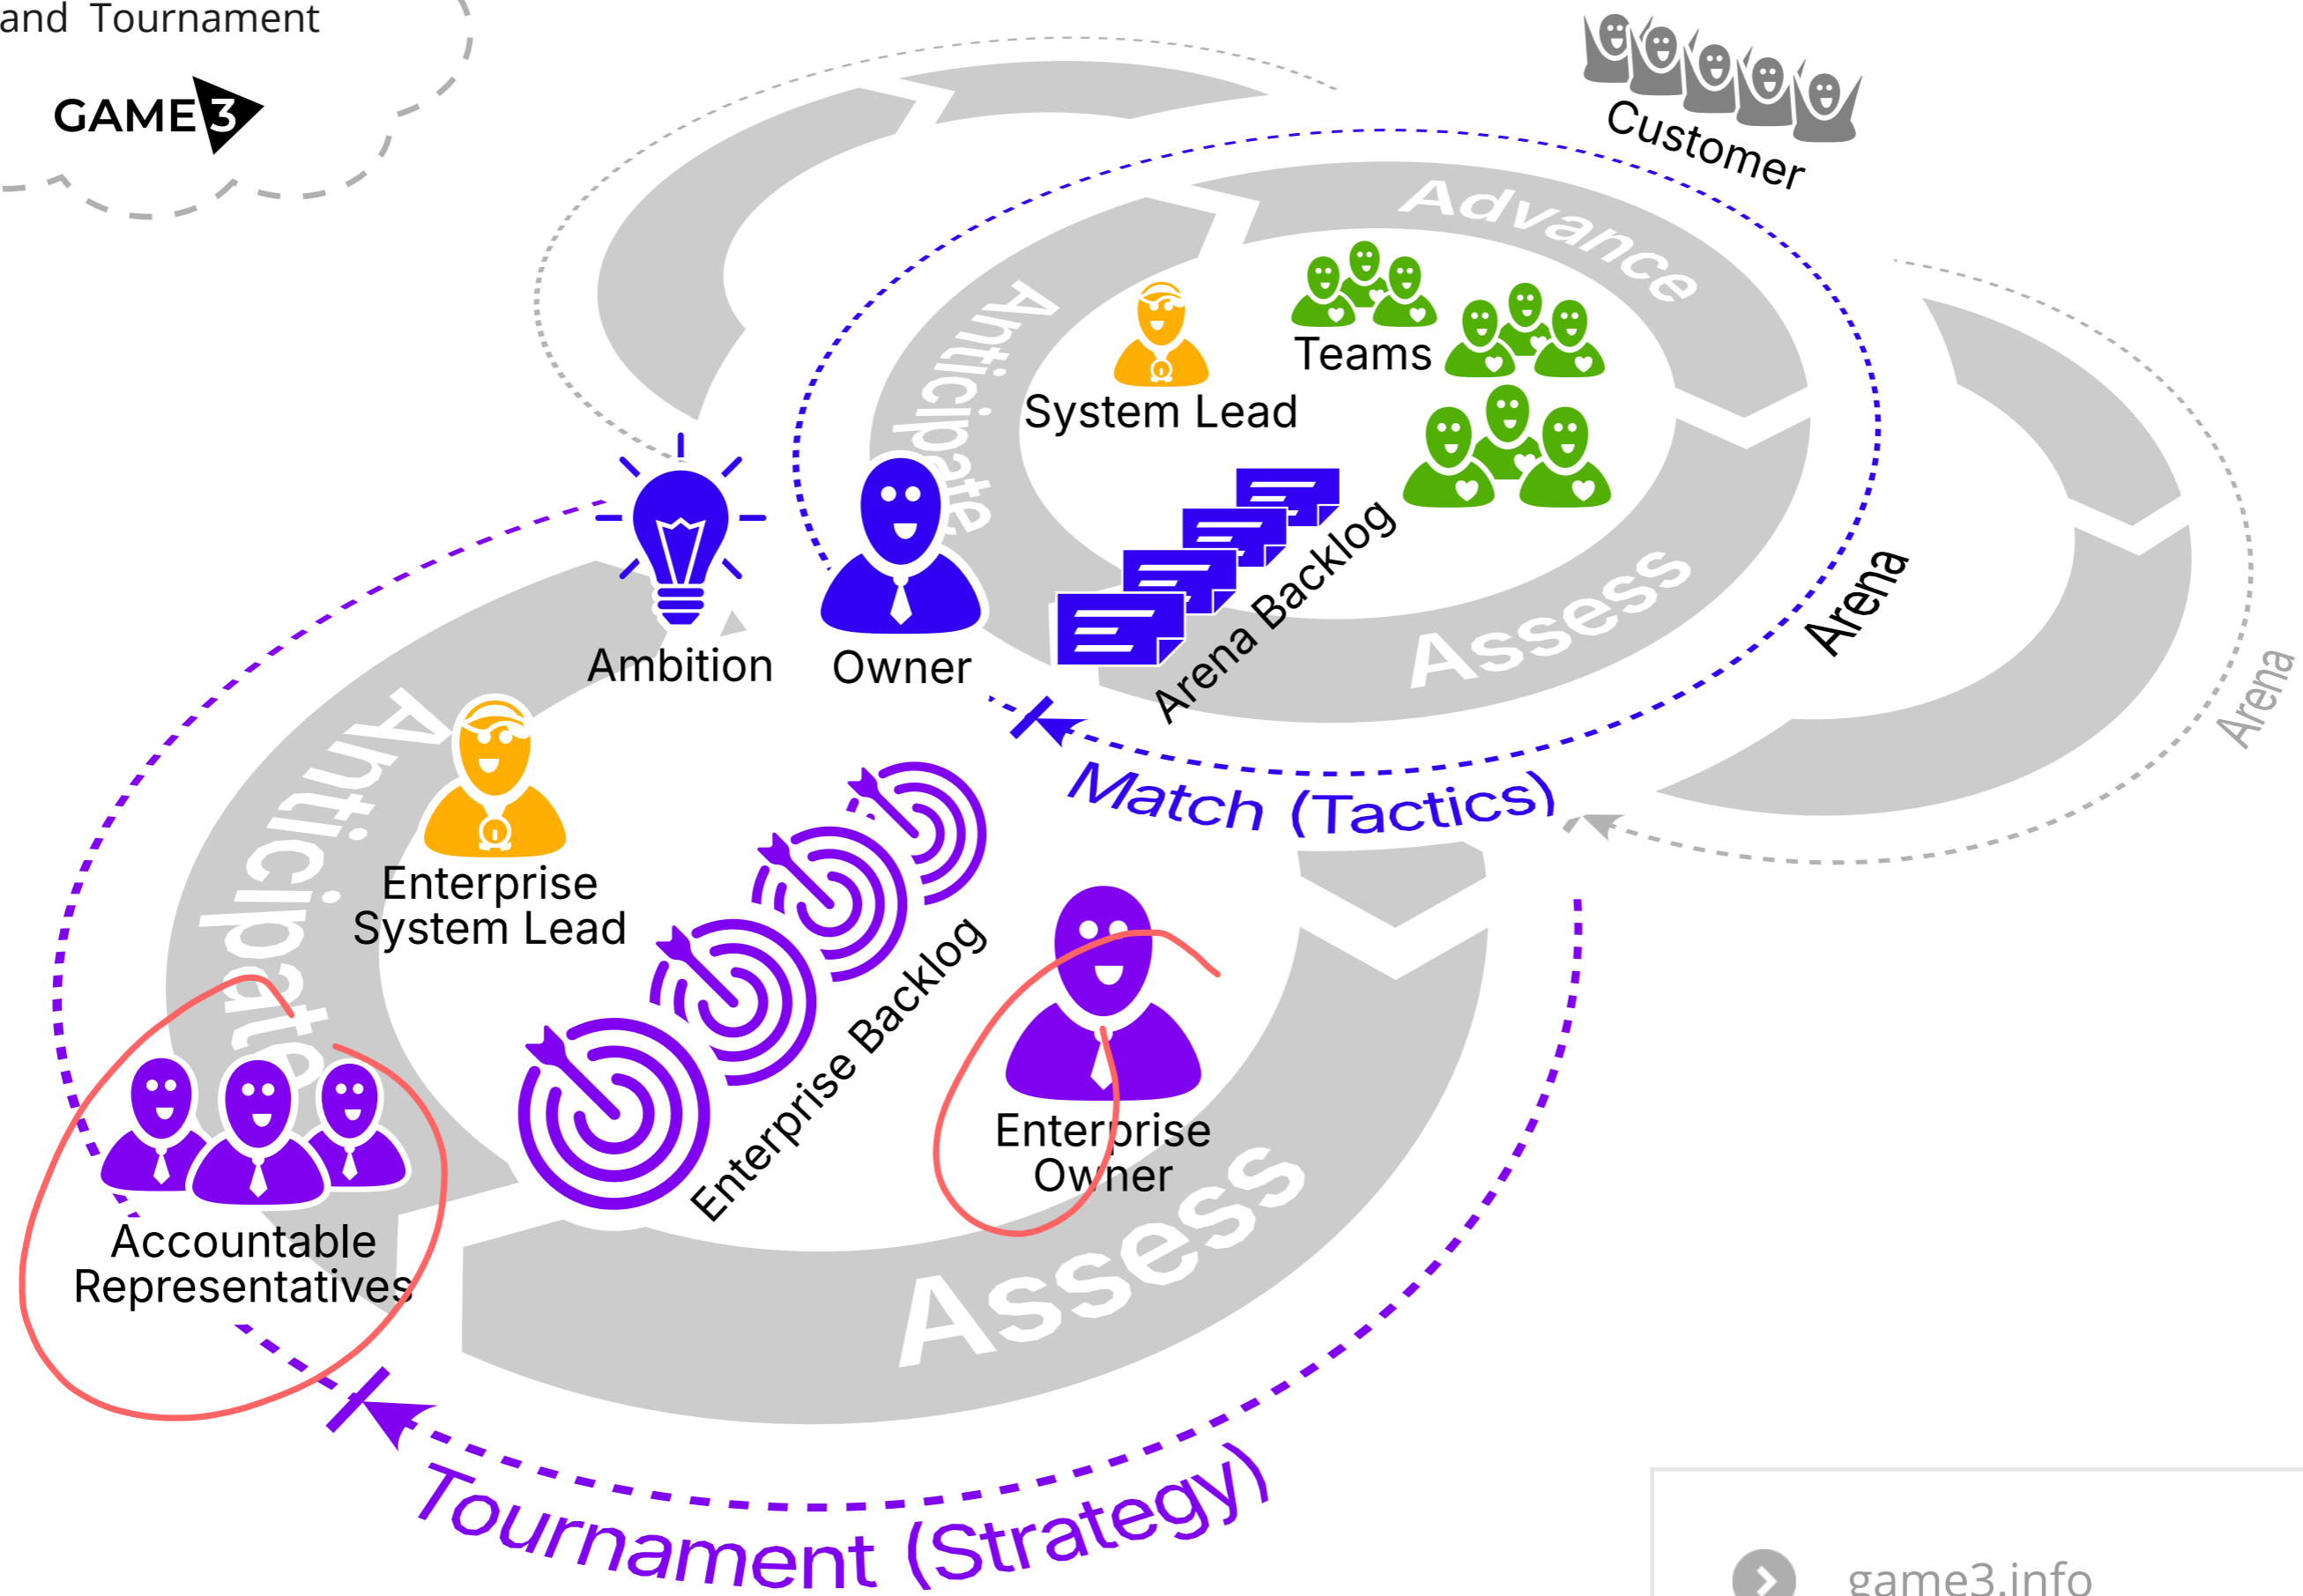

Junction #2:
Allows the WIP-
limit on active
projects to start
a new Project?

1. How many projects can your organization handle at the same time?
2. Has the WIP limit been exceeded?
3. What is the best way to introduce a WIP limit for projects in the organization?

Junction #3:
Continuation of
the project as
product
development?

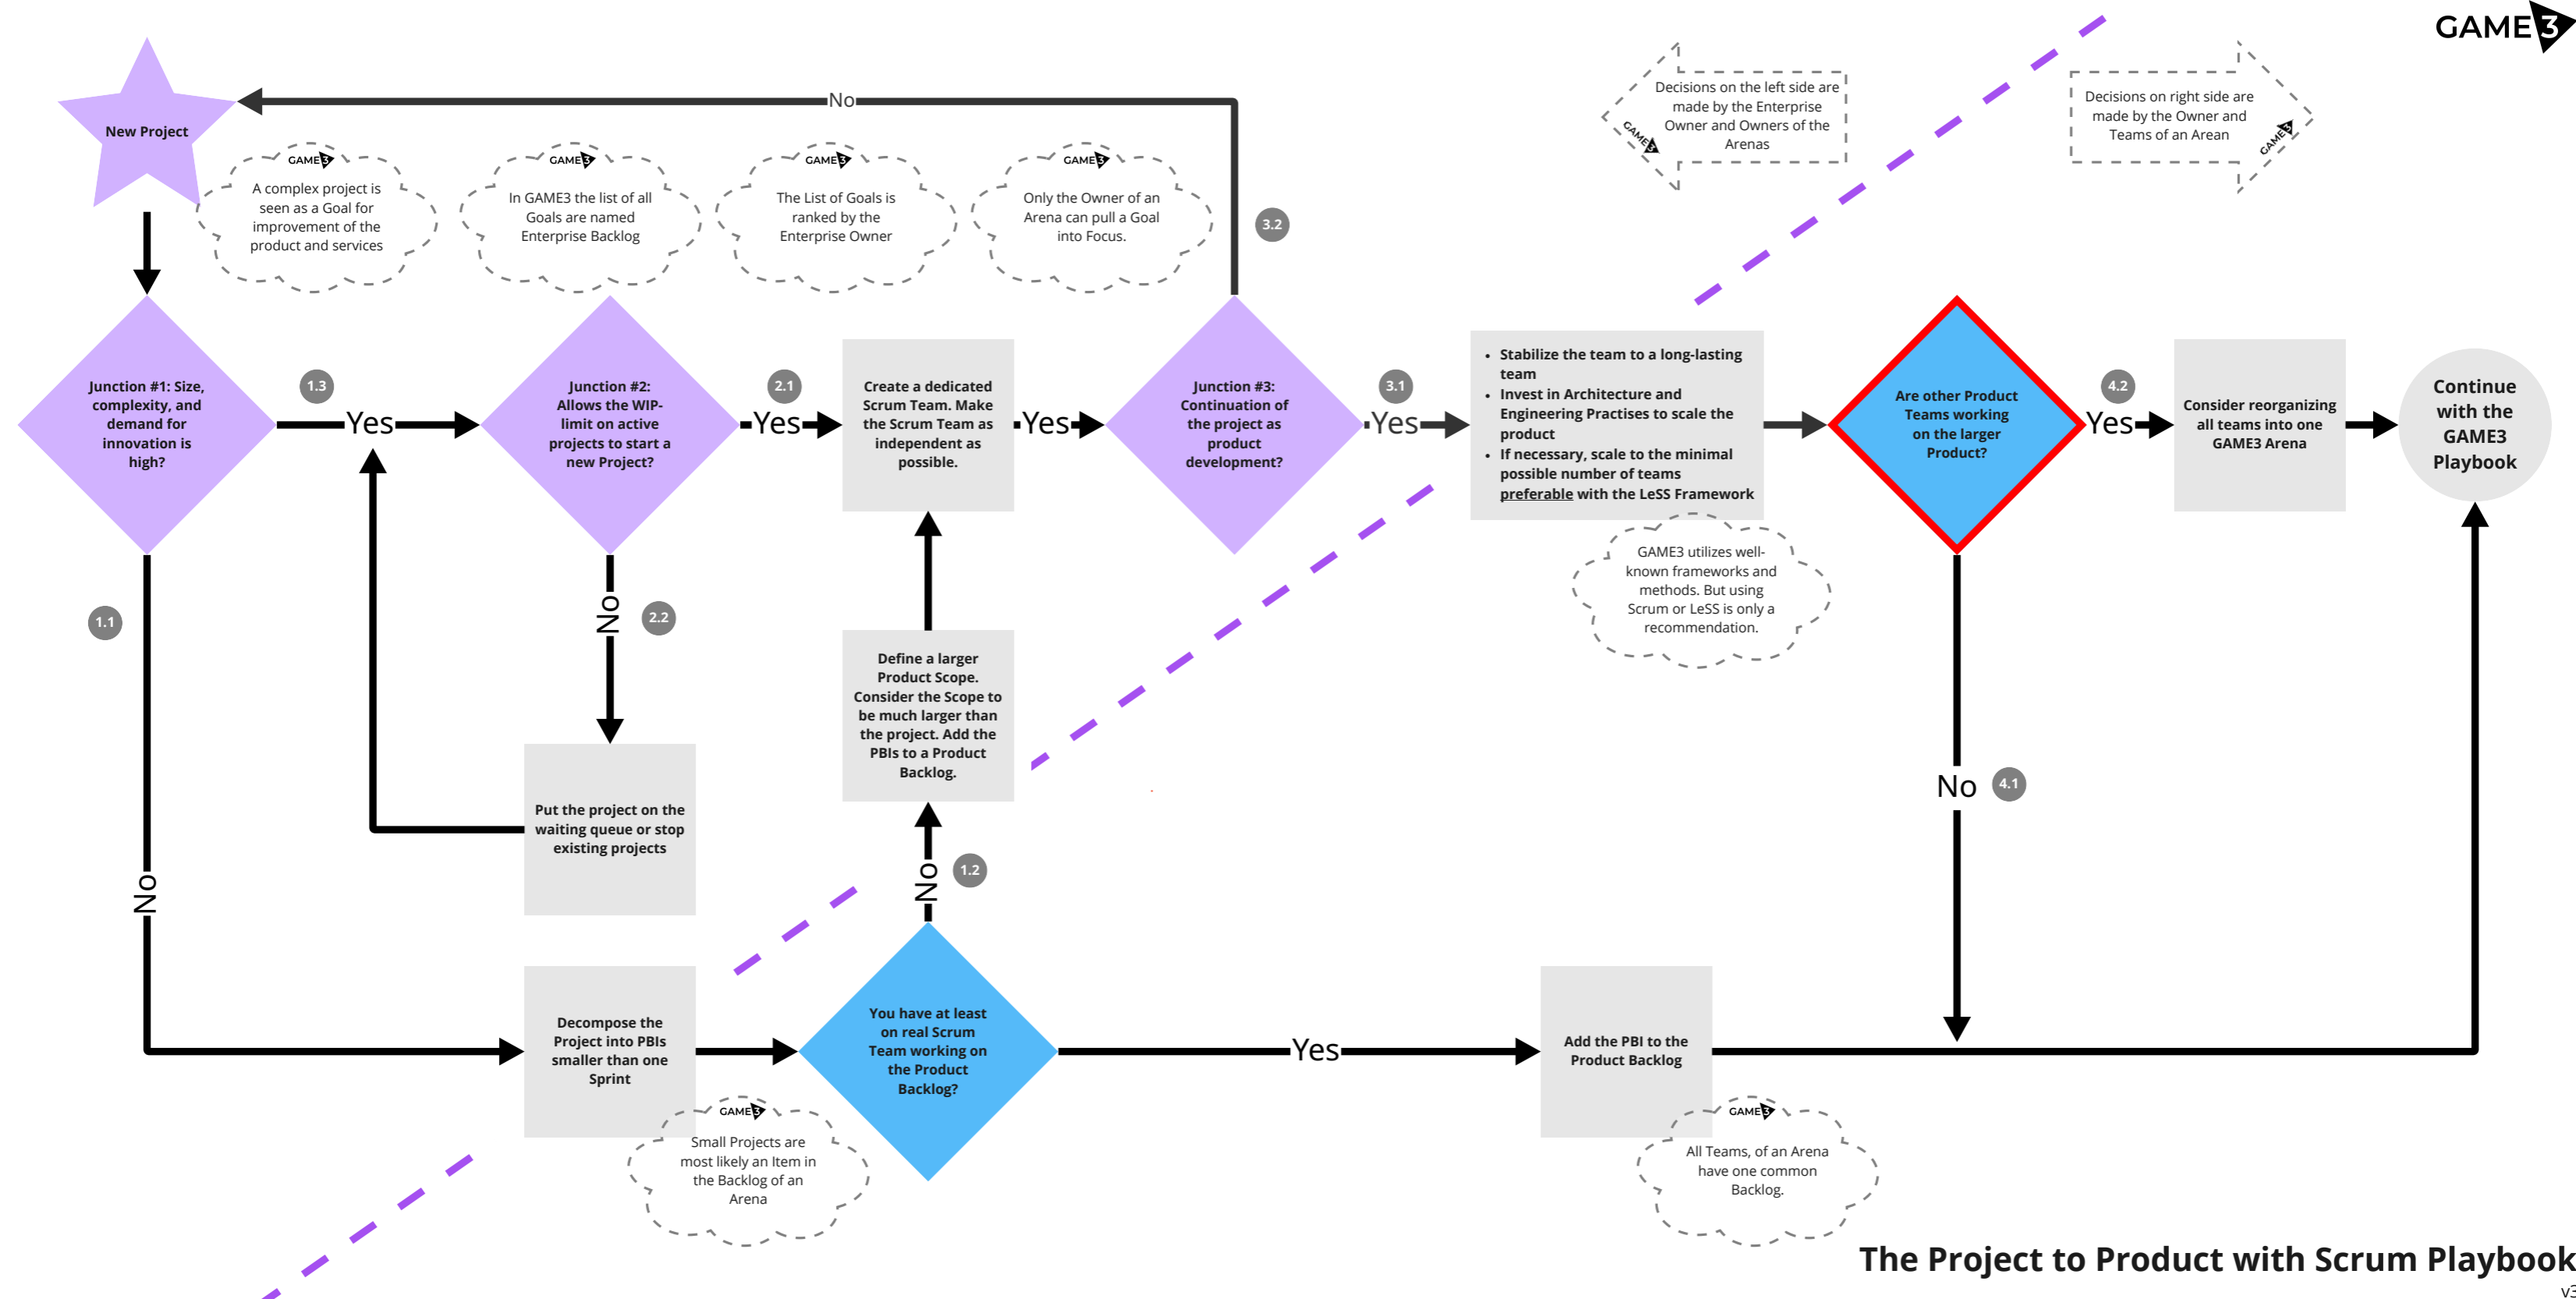

1. How does your organization deal with the transition from a project organization to a service and product organization?
2. Who in your organization can make the decision to end a project?

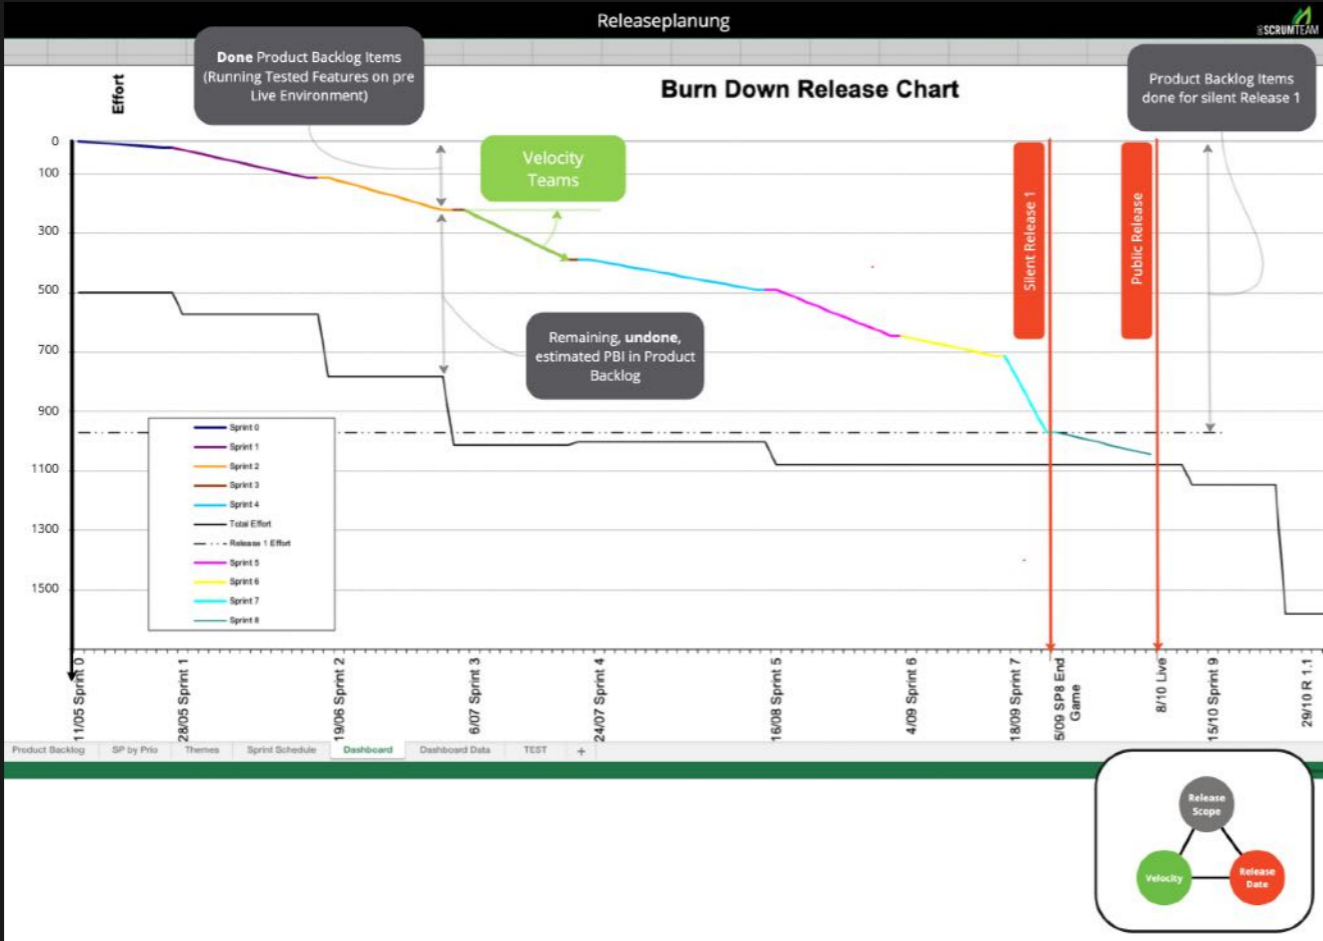

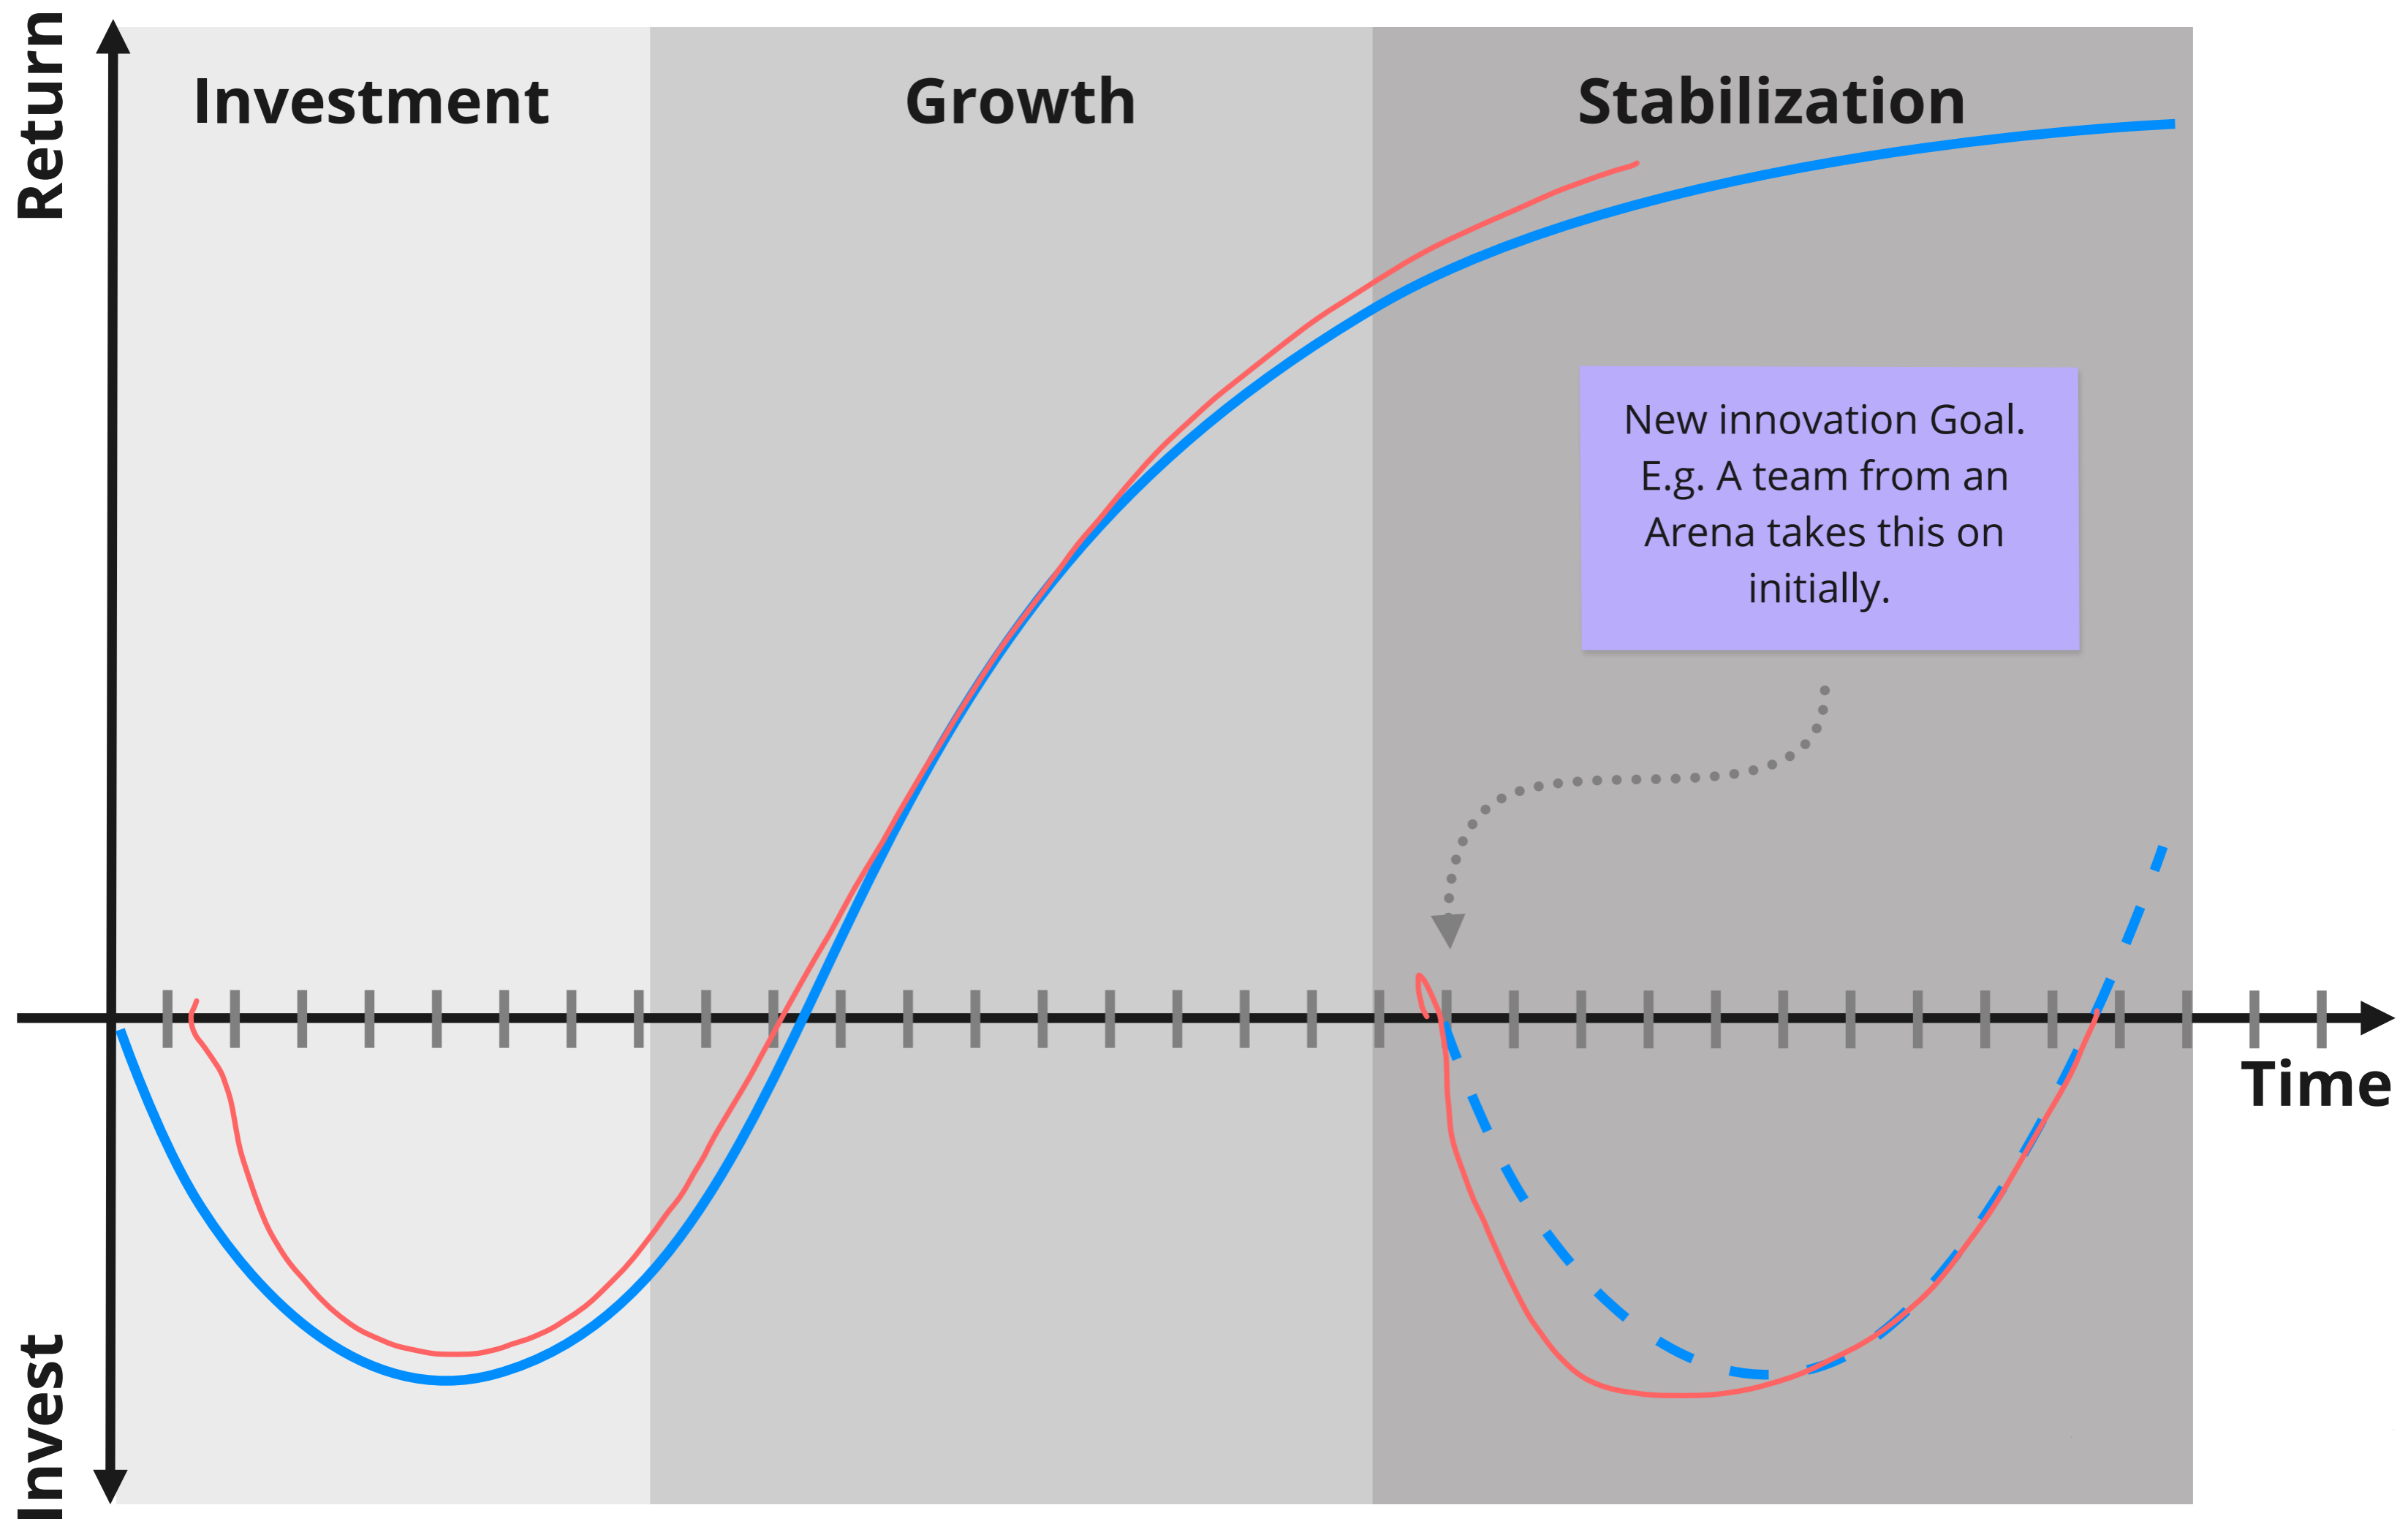

Owners lead to the **success of the product and services**. She serves the enterprise by:

- Balancing opportunities and risks.
- Focusing the organization to increase effectiveness.
- Ensuring decisions are made.

Are other Product Teams working on the larger Product?
